The Ten Values Of Excellence

Customers define a supplier as 'World Class' when they rate highly in these ten areas of satisfaction.

World Class Suppliers enjoy the highest customer preference, loyaly, return & recommend rates, and success.

Championing The Ten Values Of Excellence in your organization is called World Class Leadership.

Quality - Customers want it right the first time with zero mistakes, defects or inaccuracies, consistent with the best available anywhere.

Value - Customers want the price paid to be the best price available, to be historically appropriate and they want the product or service to remain a good value over the long term.

Timeliness - Customers want all interactions with the supplier to be on time, to take the minimum time but when needed, they want the supplier to take all the time necessary to achieve satisfaction.

Efficiency - Customers want to interact with processes that are as simple and linear as possible, and ideally with one interaction and a single point of contact.

Environment - Customers want the supplier's environment and plant to be aesthetically pleasing and well organized, physically and psychologically safe, warm and welcoming.

Connection - Customers want to be able to access the supplier easily and at their convenience, without barriers to accessing products, services, information or individual supplier representatives.

Self Management - Customers want the supplier to be well mannered, courteous and attentive, have an appearance consistent with the best in the industry and have an attitude of service.

Commitment - Customers want the supplier to demonstrate that they have their best interests in mind over the long term, to be honest and up front with all terms and conditions and to take responsibility when things go wrong.

Interdepartmental Teamwork - Customers want consistent quality interactions with all of the supplier's departments and personnel and expects these departments and personnel to cooperate well together to meet the customer's needs.

Innovation - Customers want the supplier to utilize best practice technology, processes and equipment and to demonstrate continuous improvement and optimization.

-Directions-

Stand back and take an objective look at the organization, department, division or employee you want to audit as 'the supplier' (this is the term utilized throughout the audit).

Think about your own knowledge and experience, and imagine yourself as the customer of it based upon customer experiences you know, have heard about or have insight into.

Be honest, be objective, and answer each of the questions as best you can.

There are 40 questions total with 4 questions for each of the Ten Values Of Excellence

Name of the subject of the audit (Your Restaurant etc.):	N	ame	of	the	subject	of	the	audit	(Your	Restaurant	etc.):
--	---	-----	----	-----	---------	----	-----	-------	-------	------------	------	----

Circle the number from 1 (least extent or lowest) to 10 (highest extent or most) for each question.

Afterwards, calculate your mean scores for each of the Values Of Excellence and then calculate your overall mean score combing the scores for all ten. Follow the directions to plot your scores on the World Class Leadership Impact Chart that follows.

Then read the guidelines for interpretation and business improvement.
